SUMMARY

- Versatile tech stack
- Ability to learn fast
- Passion to code :)

COURSES

- Sololearn | C++ — October 2023
- Itransition training | Commercial Software Development — Jan 2025 - Mar 2025

EXPERIENCE

ITransition – Web Developer Intern Jan 2025 — Mar 2025

- Performed various tasks
- Developed full-stack application

PROJECTS

GhostForms App | ASP.NET (C#), React (JS), Docker | [GitHub Repository](#) **Mar 2025 — Mar 2025** - Started Full-stack application for ITransition internship - Created UI using React and Bootstrap framework - Implemented backend with ASP.NET - Docker for deployment

Clocks Virtual Machine | C | [GitHub Repository](#) **Oct 2024 — Present**

- Creating simple bytecode machine and compiler for Clocks programming language. Also researching corresponding technologies and algorithms (e.g. Bytecode machine, Hash Table)

Clocks Interpreter | C++ | [GitHub Repository](#) **Sep 2023 — Feb 2024** - Developed Clocks language interpreter from the ground up. Performed optimization on return statement which resulted in 95% reduced execution time. Also filled std library with I/O and Math functionality

SKILLS SUMMARY

- **Programming Languages:** C, C++, C#, Python, Java, HTML, JavaScript, SQL
- **Build Tools:** CMake, Gradle, [Nob](#)
- **Software Development:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Data Structures and Algorithms
- **CI/CD:** Git, Docker
- **Soft Skills:** Problem-solving, Adaptability, Creativity, Goal Achievement

EXTRACURRICULAR / CERTIFICATIONS:

[Sololearn](#) | C++

[ITransition](#) | Commercial Software Development — C#
